

4 OPTICAL RETICLE

Reticles, known for their gradient lines, are used in a wide variety of applications, including sights for telescopes and optical microscopes, as well as rifle scopes. We can handle jobs from prototypes to mass production.

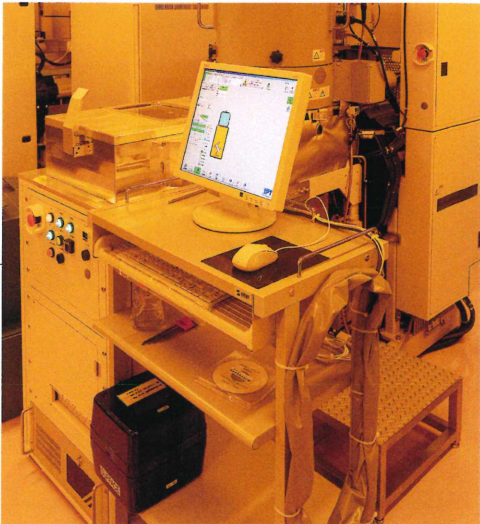

Transmitting Koshibu's reticle technologies to the world.

This is the core product for the company now, and is steeped in our long traditions and technologies.
We deal in a variety of scales, such as gradations for scopes, scales for microscopes, etc.

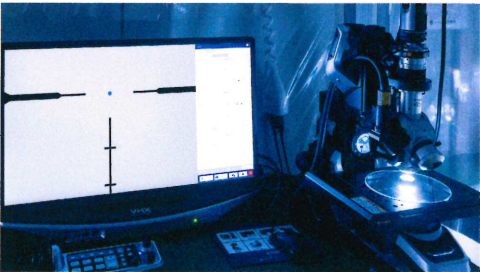

Having acquired a variety of manufacturing and inspection devices, we can provide high quality reticles. We can handle jobs from prototypes to mass production.
